Karoq

Take it easy, take it anywhere

Every journey can be the beginning of something. A valuable experience, a happy coincidence or a shared memory. And with the versatile Škoda Karoq, you can make those journeys comfortably. With its unmissable SUV styling, the Karoq is as practical as it is head-turning. Its compact proportions are underlined by a distinctive front grille and all-round protective elements. LED illumination and eye-catching alloy wheels complete the impressive exterior.

Step inside, and you'll be welcomed by customary Škoda offerings like spaciousness and all-you have connectivity features.

Exterior Design

A landmark on any road

With its robust body with protective features and higher ground clearance, the Karoq invites you to venture off the beaten track. At the same time, its compact dimensions, sleek lines, and stylish wheels accentuate the car's ambition to be a great urban SUV.

Style and functionality

The car's front features newly designed elements, such as the grille, headlights, bumper with a spoiler, and more. You'll also find air curtains in the front bumper, designed to reduce the air resistance, which streamline airflow around the front wheels and the body sides.

Top full LED tail lights

The tail lights have also been innovated both in terms of shape and technology. Fitted with animated turn indicators, they significantly improve the visibility of your car for other drivers. In addition (depending on surrounding light intensity), when you lock and unlock your car, the welcome effect activates the animation feature.

Full LED Matrix headlights

The newly shaped Karoq headlights are equipped with LED lights that offer high performance and high energy efficiency. The top-end option comes with full LED Matrix headlights, giving the driver maximum light power without dazzling other road users.

SUV signature

The new Karoq evokes a sense of strength and security greatly enhanced with a newly shaped robust rear bumper with black diffuser. With its higher ground clearance, the vehicle can travel off the tarmac regardless of the type of drive selected.

Interior Equipment

Spend hours in one place

Inside the car, spaciousness meets sophisticated style and modern technology. The interior boasts new upholstery and a number of practical equipment to increase your comfort and safety.

10" Virtual Cockpit

The Virtual Cockpit displays onboard computer specifications in combination with other information, such as navigation. You can choose from five layouts (Classic view shown) controlled via the View button on the steering wheel.

9.2" Digital display

The new Karoq features a digital display with clearly readable graphics, which takes all the information you need and puts it where you need it most – in your field of vision.

Comfort in the back

On the rear part of the Jumbo box, you will find, among other things, a USB-C port, enabling mobile phone charging, and a socket (230 V or 12 V) along with the 3-zone climatronic system.

Air Care

The Climatronic air conditioning features Air Care function. Air Care can clean dust from the interior and must be activated by the driver via the Climatronic menu.

Simply
Clever

Glove compartment

The closed storage compartment is located in the lower part of the dashboard by the front passenger.

Škoda's little helpers

Driver's storage box

The driver can utilise a practical tilting storage compartment located directly below the steering wheel.

Life is easier when the equipment is practical. The new Karoq offers plenty of smart storage space and other helpful details that make everyday journeys more enjoyable.

Phone box

The phone box, also suitable for large display devices, wirelessly charges your device while driving. Two USB-C data ports located above the phone box allow you to easily connect and pair your external devices with the infotainment system.

Comfort
and Space

Comfort is your co-driver

Indulge yourself even when driving. Modern technologies, remarkable roominess, and a host of practical details will turn your everyday journey into a luxury trip.

KESY

You will quickly get used to the convenience of KESY (the Keyless entry, start and exit system), which allows you to lock/unlock your car and start the ignition/switch off the engine without inserting the key.

Welcome logo

The LEDs on the front doors' underside, projecting the Škoda inscription, illuminate the entry area.

Jumbo box

The spacious Jumbo box storage compartment is housed in the front armrest. You can, for example, store your electronic items safely inside. The Jumbo box can also be equipped with a coin holder and two drink holders with Easy Open function.

Rear armrest

When the middle rear seat is not occupied, the armrest with drink holders can be folded down.

VarioFlex options

To enlarge the luggage area, you can tilt all the rear seats towards the front seats (see the left seat). This position also allows you to remove them easily. This can be done single-handedly and does not require the use of any tools.

**Fold it. Move it.
Remove it**

The VarioFlex rear seating system allows you to customise the interior according to your current situation. It is comprised of three separate rear seats. You can fold each one down independently, as well as remove them completely.

VarioFlex – all seats folded down

The luggage compartment, with a basic volume of 588 litres, can be extended up to 1,605 litres by folding the rear seat backrests down.

VarioFlex – all seats removed

If you completely remove the rear seats, you gain a luggage area with a capacity of 1,810 litres.
