ENVIRONMENTAL INFORMATION

LIGHTING

Headlamps and rear lamps are 100% LED, increasing life service by up to 10 times. For headlamps, power consumption is significantly reduced at least 30%, and the luminous flux effectiveness is increased at least 30% in comparison to a halogen lamp.

RECYCLED MATERIALS

Seat bucket (no leather) configuration: In its central area contains microfiber Dinamica® with 73% of recycled polyester (pre-consumer and post-consumer origin).

Seat cupbucket configuration: In its central area contains microfiber Dinamica® with 73% of recycled polyester (pre-consumer and post-consumer origin).

MANUFACTURING PROCESS

Between 2010 and 2023, we reduced the CO_2 emissions per manufactured car by 69.3%, while also cutting the energy demand per car by 33.3%. Additionally, we achieved a 45.1% saving in water consumption and a 78.9% reduction in waste generated per car.

In our path towards a circular economy, we have established a process for dismantling discarded parts and components. This process breaks down complex items into single-material parts, enabling proper segregation and giving these materials a second life. As a result, what was once considered non-recoverable waste is now transformed into revalorized, reusable materials.

SEAT S.A.'s environmental mission.
Protect Climate. Conserve Resources. Preserve Ecosystems. Ensure Environmental Compliance.

TECHNICALS

In the realm of CUPRA Leon, technical prowess is more than mere numbers; it's a symphony of engineering achievements. Here, every detail sings of dedication to excellence, marrying power with sustainability, efficiency with passion. This is where state-of-the-art transmission systems and optimized fuel consumption converge, creating a driving experience that connects you with the heart of the road.
