1.Data is based on engineering test results and may vary due to test factors such as weather, road conditions, battery charge, load, and tire specifications.
2.This is based on the longest range data of the ZEEKR 7X's ternary (NCM) lithium battery pack, and 3.8s is the fastest 0-100 km/h acceleration time for the AWD Performance variant.
3.The charging data reflects the fastest charging time for the second-generation Golden Brick battery when using the V3 liquid-cooled supercharger at room temperature.
4.The configurations mentioned are not standard across all variants. Please refer to the product configuration table for details.
5.The materials are for reference only; the actual product delivered will take precedence.
